# With Less Than One Week Left Before the Mommy Makeover Seminar at MilfordMD Cosmetic Dermatology Surgery & Laser Center, Seats Are Booking Up Quickly

## Share Article

Attention moms of all ages who want their pre-baby bodies back! Dr. Richard E. Buckley is hosting a free seminar and providing complementary consultations during the April 26 "From Mom to Bombshell" event at his Milford, Penn., cosmetic surgery practice - only a few seats left!

### MILFORD, PA (PRWEB) APRIL 20, 2016

It's less than one week before the free-to-the-public Mommy Makeover Seminar at MilfordMD Cosmetic Dermatology Surgery & Laser Center. The Tuesday, April 26 seminar, "**From Mom to Bombshell**," will address all the cosmetic concerns women have post-pregnancy, as well as today's most popular options from breast lift, breast augmentation and breast reduction, to tummy tucks, laser liposuction, skin tightening and fiber release (to address cellulite) and treatment of pesky pregnancy-related skin problems, such as melasma or stretchmarks. The two-hour seminar, for moms of all ages, starts at 5 p.m.

MilfordMD Medical Director, Richard E. Buckley, M.D., will offer complimentary consultations to those who attend. And attendees will receive exclusive seminar specials, as well as get the chance to participate in skin care product raffles and win prizes. Snacks and refreshments will be served.

With less than 1-week left to register for MilfordMD's mommy makeover seminar on April 26th seats are booking up quickly! Come

The seminar couldn't come at a better time, according to Dr. Buckley. "Even young women are making it known that they want to keep up their bodies," Dr. Buckley says. "A new survey by the American Academy of Facial Plastic and Reconstructive Surgery showed that 64 percent of the surgeon members surveyed indicated an increase in patients younger than 30. It's no wonder, given that many of the body sculpting, shaping and tightening procedures today are non-invasive or minimally invasive. That's perfect for the busy new mom."

Other recent statistics also point to the tremendous popularity among women of the very procedures that Dr. Buckley will discuss at the Mommy Makeover Seminar. The most recent statistics by the American Society of Plastic Surgeons suggest today's most popular cosmetic surgical procedure among women is breast augmentation, followed by liposuction and eyelid surgery (blepharoplasty). The tummy tuck (abdominoplasty) is fifth on the top-five list. Some new moms want only a quick pick-me-up to address a small area of exercise-resistant fat or cellulite, while others elect to have a combination of procedures, such as a breast lift and tummy tuck, to get back their post-pregnancy bodies.

"MilfordMD Cosmetic Dermatology Surgery & Laser Center offers the spectrum of new devices for permanent fat removal, including ProLipo [laser-assisted liposuction](#), PrecisionTx and SmartLipo Triplex with local tumescent anesthesia. For those looking for a non-invasive approach to fat reduction, MilfordMD Cosmetic Dermatology Surgery & Laser Center offers CoolSculpting, an FDA-approved non-surgical procedure that freezes fat to eliminate bulges and improve contours. These procedures help to sculpt the body, restoring the natural curves and removing unwanted fat around the abdomen, thighs and more," Dr. Buckley says. "There are also options, such as [Cellulaze](#), Venus Freeze and Thermage—treatments that address cellulite and can help tighten the skin."

Breast shape and size are often a concern among women who have given birth. "For moms whose breasts have lost their fullness and shape after breastfeeding, MilfordMD offers breast lifts, implants, as well as a natural alternative to breast augmentation with natural fat transfer (AFT). It's an autologous fat transfer, in which we use a patient's own fat (instead of implants) to sculpt the breast, and to make it a cup size or so larger, per session," Dr. Buckley says.

And for moms whose once flat, tight and toned stomachs have change post-pregnancy, there's an [advanced technique tummy tuck](#) (Avelar) surgery. Dr. Buckley may also perform a mini tummy tuck, when women have only a slight belly protrusion to address. Both procedures result in a flatter, firmer abdomen, with less frontal protrusion and tighter skin.

Reservations are required for the free seminar. To reserve a spot, call MilfordMD at (570) 296-4000. Dr. Buckley's office is at 303 W. Hartford St., Milford, Penn.
