

Only A Few Days Away: Two January 2018 “New Year, New You” Body Sculpting Seminars Free and Open to the Public at MilfordMD Cosmetic Dermatology Surgery & Laser Center

Share Article

For those who not only want to shed some pounds in the New Year but also want a more sculpted physique, MilfordMD Cosmetic Dermatology Surgery & Laser Center, in Milford Penn., is hosting two January seminars, led by two of the area’s most experienced cosmetic surgeons, who will present the latest in body sculpting options. These “New Year, New You” bodysculpting special events take place Friday, January 12 at noon, for a “lunch and learn,” and Thursday, January 18, for an evening seminar with “bubbly,” starting at 6:30 p.m.

MILFORD, PA (PRWEB) JANUARY 04, 2018

For those who not only want to shed some pounds in the New Year but also want a more sculpted physique, MilfordMD Cosmetic Dermatology Surgery & Laser Center, in Milford Penn., is hosting two January seminars, led by two of the area’s most experienced cosmetic surgeons, who will present the latest in bodysculpting options. These “**New Year, New You**” bodysculpting special events take place Friday, January 12, at noon, for a “lunch and learn,” and Thursday, January 18, for an evening seminar with “bubbly,” starting at 6:30 p.m.

Cosmetic surgeon Dr. Marina Buckley and Medical Director at MilfordMD Cosmetic Dermatology Surgery & Laser Center, in Milford, Penn., Dr. Richard Buckley will be on hand to answer questions and talk about today’s bodysculpting options, including **laser liposculpting**, CoolSculpting, and surgical options. Attendees who RSVP for one of the events will not only learn about the world’s most popular options for non-invasive fat reduction, but will also experience the latest in 3D photography, which allows men and women to visualize what they might look like after procedures, before they have the actual treatments.

For over 30 years Drs. Richard & Marina Buckley have dedicated their practice in helping over 30,000 patients achieve their New Year’s resolution. Join them as they

A light lunch will be served for the January 12 seminar and refreshments and champagne for the evening event on January 18. Those who attend either of the seminars can take advantage of special pricing on bodysculpting procedures available only during the New Year, New You bodysculpting special events, as well as enter raffles to win popular MilfordMD skin care products.

“Together, Marina and I have helped more than 30,000 patients achieve their health and cosmetic goals,” Dr. Richard Buckley says. “We’ve found that these seminars provide a great opportunity to meet people, educate them and answer their questions, and to help them to get to know us and feel comfortable in our practice to alleviate the uncertainty of these types of procedures.”

Among the headliners of the 2018 New Year, New You events: **CoolSculpting**. CoolSculpting remains the number one non-surgical fat reduction treatment in the world, and the only FDA-cleared non-surgical fat reduction device that uses controlled cooling to eliminate unwanted areas of fat. “We might be tired of the freezing cold this winter. But, in cosmetic medicine, freezing has its benefits,” Dr. Buckley says. “The approach, called Cryolipolysis, allows us to treat the unwanted fat without making any incisions or doing surgery. The device accomplishes the task from outside the body, and patients basically go about their day after treatment.” In essence, CoolSculpting reduces the temperature of the fatty tissue to where those cells die and are eliminated during the weeks after treatment. Those fat cells are gone for good, according to Dr. Buckley.

CoolSculpting treatment can reduce fat under the chin, on the arms, around the lower and upper abdomen, on the love hands, under the bra (known as “bra rolls”) and on the inner and out thighs. “CoolSculpting is a safe, effective way to reduce stubborn areas of fat. It’s not a weight-loss strategy. That’s why we refer to it as a way to sculpt the body. It’s a perfect adjunct to a healthy commitment to eat sensibly and exercise,” Dr. Buckley says.

“There are other options for removing more substantial amounts of fat with laser liposuction, such as MilfordMD’s **SmartLipo Triplex**, which is also a tried-and-true, safe and popular option for fat reduction.” The doctors will also discuss liposculpture, tummy tucks and other surgical options for more dramatic results. “We can remove as much as a gallon of fat with each liposculpture procedure,” Dr. Buckley says. “The message is that today’s nonsurgical devices and refined surgical approaches can help anyone achieve his or her body shape goals for the New Year.”

You can [RSVP online](#) for one of these complimentary seminars, or call MilfordMD at (570) 296-4000.
