Those who attend can get a complimentary consultation after the CoolSculpting presentation, qualify for exclusive seminar discounts, as well as enter a drawing to win a CoolSculpting treatment.

MILFORD, PA (PRWEB) JUNE 10, 2016

Save the Date: the world's number one non-invasive fat removal treatment **CoolSculpting** will be featured at a free CoolSculpting event, open to the public, Thursday, June 16 at MilfordMD Cosmetic Dermatology Surgery & Laser Center, in Milford, Penn. The event, "A Cool Event this Summer," will take place from 5 p.m. to 7 p.m. Those who attend can get a complimentary consultation after the CoolSculpting presentation, qualify for exclusive seminar discounts, as well as enter a drawing to win a free CoolSculpting treatment.

"The demand for this new noninvasive, nonsurgical fat removal treatment is amazing," says cosmetic surgeon and MilfordMD Medical Director Dr. Richard E. Buckley, M.D. "That's why we've decided to dedicate an evening at the practice to educate people about how CoolSculpting freezes away fat cells for good, without downtime." CoolSculpting is the only noninvasive fat reduction treatment FDA-cleared to safely target and eliminate fat cells through the use of controlled cooling.

Lose the Fat - No Surgery Required. Join us on Thursday, June 16th to learn how CoolSculpting can freeze away fat cells for good, without surgery or downtime. Attend and enjoy a chance to win a CoolSc

"It's ideal for people who don't want to get the more invasive fat removal options, like [laser lipo](#), but are concerned with areas of exercise-resistant fat around their thighs, the abdomen, neck or elsewhere," Dr. Marina Buckley says. "CoolSculpting is not a weight loss solution. The amount of fat we can remove with this noninvasive procedure equates to small, but noticeable fat pockets. With the more invasive procedures, like Smartlipo and Prolipo, we can remove as much as a gallon of fat. There is, however, a downtime associated with those procedures."

CoolSculpting works by precisely, and in a controlled fashion, delivering cooling to fat cells under the skin. Fat cells freeze at higher temperatures than surrounding tissue. Once treated with CoolSculpting, the fat cells crystallize, or freeze; then die. The body naturally processes the fat and eliminates the dead cells over time.

"CoolSculpting treatment is, for the most part, painless. In fact, many of my patients have napped during treatments. Some people feel some discomfort, like a pinching, tugging or numbing sensation, but that dissipates," Dr. Marina Buckley says. "And there is no downtime, so patients can resume activities after they leave the office. Patients may have some pain, swelling or temporary numbness in the days following the procedure."

Some patients need only one in-office CoolSculpting procedure to achieve the desired effects, while others might need more. But once the fat cells are frozen and eliminated by the body, they're gone for good, according to Dr. Buckley.

"Patients generally see changes within three or more weeks after CoolSculpting. So, this isn't a great option for people who want immediate results. Again, there are lots of other fat removal options that offer immediate post-procedure results," Dr. Buckley says. "We encourage patients to exercise and eat right to maintain the optimal results from any body sculpting procedure."

Reservations are required for this CoolSculpting event. To reserve a spot, call MilfordMD at (570) 296-4000. MilfordMD Cosmetic Dermatology Surgery & Laser Center is at 303 W. Hartford St., Milford, Penn.
