

# The Lineup of Demo Treatments Have Been Announced Only a Week from MilfordMD Surgery & Laser Center's Holiday Rejuvenation Event

## Share Article

It's almost time for MilfordMD Cosmetic Dermatology Surgery & Laser Center's Thursday, November 3rd special event: "New Techniques in Facial Rejuvenation." The public is invited to attend this free seminar, which will have live presentations to showcase some of the latest in facial rejuvenation treatments.

### MILFORD, PA (PRWEB) OCTOBER 27, 2016

MilfordMD Cosmetic Dermatology Surgery & Laser Center, Milford, Penn., has announced that sample ThermiSmooth, Dysport, HydraFacial MD, and Venus Freeze treatments will be demonstrated live at their special event "[New Techniques in Facial Rejuvenation](#), which is only one week away." This two-hour seminar, which is free and open to the public on Thursday, November 3, 2016 at 5 p.m., will feature all that's new and exciting in noninvasive and minimally invasive facial rejuvenation.

"The holidays are around the corner, but there's still time for facial fillers, wrinkle relaxers, skin tighteners, skin smoothers and much more that will have you looking your best just in time for the big dinners, parties and gatherings," says cosmetic surgeon and MilfordMD Medical Director, Dr. Richard Buckley. "We'll talk about all the new and exciting noninvasive and minimally invasive cosmetic options at our upcoming facial rejuvenation special event, offer complimentary facial rejuvenation consultations, discounts on popular procedures and more."

MilfordMD's cosmetic physicians Drs. Richard and Marina Buckley will educate attendees about some of the options in facial rejuvenation through live demonstrations. There's more to this holiday happening: Those who attend will receive valuable discounts towards a

Everyone wants to look their best for the upcoming holidays. MilfordMD's Holiday Makeover Event is designed to showcase the hottest and latest trends in minimally to non-invasive cosmetic procedures.

“The holidays are around the corner, but there’s still time for the latest noninvasive and

personalized holiday makeover, will have chances to win prizes, and can enter raffles. Light snacks and refreshments will be served.

"It's our way of helping people get a little pampering in preparation for the holidays," Dr. Buckley says. "Often, we're running around so much trying to make sure everybody else is take care of, we forget to take care of ourselves."

The evening will be dedicated to ideal holiday makeover essentials with minimal to no downtime, including injectables, such as Botox, Juvéderm, Restylane; lasers and radiofrequency devices; Fraxel; Thermage; ThermiTight and ThermiRase; as well as non-invasive Ultherapy and CoolSculpting for neck, jowls and chin contouring.

"**Botox** has a long and impressive track record for relaxing the deep, persistent lines that make us look stressed and older," Dr. Buckley says.

"We'll talk about the possibilities with Botox, how quickly patients will see results and how long those results should last. We'll also talk about a lesser known, but equally effective, toxin-free approach for disabling nerves that cause neck cords to become more visible, called ThermiRase."

Hyaluronic acid facial fillers, including Juvéderm and Restylane family of injectables, are FDA-approved options for quickly adding volume lost to the aging process. And results last up to a year, according to Dr. Buckley.

A 20- to 25-minute full-face treatment with the **Fraxel** re:store or Thulium can pay big pre-holiday benefits, with smoother, less wrinkly skin; less visible acne scars; fewer and lighter sun and age spots; and more beautiful skin texture and tone, according to the cosmetic surgeon.

Thermi radiofrequency devices are making headlines for being effective without resulting in downtime. Some of these are for facial rejuvenation, including ThermiTight for neck skin tightening, as well as ThermiSmooth, which delivers precise heating to the skin's surface to gently target loose skin around the eyes and mouth.

Fat freezing with CoolSculpting remains one of MilfordMD's most popular noninvasive neck and body sculpting options. But it's not the only option. **Ultherapy** uses tried-and-true HIFU ultrasound technology to noninvasively lift the brows, face and under the chin.

"These are a few of the many great options people have, which can address their specific facial aging concerns just in time for the holidays. And they can have these procedures without missing a beat. In other words, they can go back to their shopping, planning, socializing and more, looking their holiday best," Dr. Buckley says.

This special event will take place in the comfort of the MilfordMD Cosmetic Dermatology Surgery & Laser Center office, at 303 W Harford Street, Milford Penn. Seating is very limited for the November 3 seminar, "New Techniques in Facial Rejuvenation," and RSVPs are required. To reserve your seat, call MilfordMD Cosmetic Dermatology Surgery & Laser Center at 570-296-4000.
